

SPH480  
Public Health Research  
Methods  
Spring 2022

**Welcome  
back, Huskies!**

# To enter into the classroom space

When you arrive:

- Music
  - Each person, please share 1-2 tracks that makes you feel joy, comfort, calm, or otherwise well.
  - Shared playlist on Spotify
- 3 min. Self-care practice: e.g., breathing exercise, stretching, journaling independently, a moment to come into the learning community.
  - Invitations, not expectations
  - Do what works for you

Knowledge credit: Dr. Stacey Patton, PhD

# What's the brain got to do with it?

- Stress changes the structures of the brain.
- When in a state of vigilance & reactivity, we cannot learn.
- “Brains grow the best, function the best in supportive relationships, low stress. Emotional regulation to enhance learning.”
- Starts class with embodiment, grounding

# Today's Offered Practice

- Take a deep breath— expand your belly 360 degrees, like an umbrella.
- Slow it down, and repeat 3-5 more times.

# Some Assumptions

- You are full human beings.
- You deserve to be here.
- You are not required to be “strong” to be valuable.
  - Struggle is normal.
  - The outside world affects us.
  - Humans are social, and we all need help.
- Your mental health is important.
- You teach each other, and us.
- You can do this, even if it looks a little different.

# Acknowledgments

- Knowledge: (via SHIFT)
- Land: UW occupies the traditional land of Coast Salish peoples: Suquamish, Tulalip and Muckleshoot nations, Duwamish Tribe. Past, present, & future
- Labor: We do our work in a country that was built by the exploitation of enslaved people from Africa, and indigenous to this land.
- **Action:**
  - <https://resourcegeneration.org/land-reparations-indigenous-solidarity-action-guide/>
  - <https://www.racialequitytools.org/plan/issues/reparations>
  - <https://www.realrentduwamish.org/about-the-tribe.html>

*What is the impact of colonization and historical trauma on a community's health? How do we mitigate this?*

# Co-create Class Playlist on Padlet

- Link in the chat, and on Canvas
- Please share a song that makes you feel joyful, calm, happy, or well.
  - Include title and artist
  - If your song is not available on Spotify, please tell us where we can find it.
- Posts are anonymous, your names optional.
- Continue to add your ideas at any time today, or email the teaching team with additional song ideas.

# This week's learning objectives

- **Today:**
  - Meet your instructor team & group
  - Orient to the space, approach, and course flow, and context of public health research
  - Try out some technology we will use
- **Outside of class:**
  - Be familiar with the course approach & logistics— see posted video for details
  - Think about research topics with your group
- **Quiz Section**
  - Meet with your groups, establish group norms
  - Discuss your research topic for the quarter

# SPH 480 Teaching Team

## Instructors

**Kate West, PhD, MS**

She/her/hers

[westkate@uw.edu](mailto:westkate@uw.edu)

Clinical Assistant Professor  
Department of Global Health  
Formerly Bioethics & Humanities

**Rena Patel MD, MPH**

She/her/hers

[rcpatel@uw.edu](mailto:rcpatel@uw.edu)

Assistant Professor  
Department of Medicine, Division of  
Allergy and Infectious Diseases

## Teaching Assistants

**Donghoon Lee, MSc**

He/him/his

PhD student, Health Services

[donghlee@uw.edu](mailto:donghlee@uw.edu)

**Kristen Danforth, MPH**

She/her/hers

PhD candidate

Implementation Science-Global Health

[danfortk@uw.edu](mailto:danfortk@uw.edu)

Office hours: in-person after  
class on Thursdays; can meet  
via Zoom, please email!

# Rena Patel

She/her/hers [rcpatel@uw.edu](mailto:rcpatel@uw.edu)

**UIC** UNIVERSITY OF ILLINOIS  
AT CHICAGO

UNIVERSITY OF  
CAMBRIDGE

**STANFORD**

# Kristen Danforth

(She/her/hers)

Global Health all the way (BS in International Health, MPH in International Health, PhD in Global Health *5th year*)

# Kate McGlone West, PhD, MS

## (She/her/hers)

High School: French, music & theater; Barista, babysitter

M.S. Biology, CBPR, Qualitative research

Reproductive Health (public health education & practice); restaurant server

B.A. Politics  
A cappella, diving team, swim instructor, grocery market/café

SCHOOL OF PUBLIC HEALTH  
UNIVERSITY of WASHINGTON

Ph.D. Public Health Genetics

Bioethics, Qualitative research, Community-engaged research

Research: Bioethics & Humanities  
Teaching: Dept of Global Health, PH-GH Major

*Note: Zoom Office Hours changed to Wed, 2-3 ;  
in-person still Thursdays after class*

## This Course is a Mentored Research Experience:

Approximates real-world professional research  
With more support— learn by doing

# THE WHAT: DEFINING RESEARCH

**“Do your research!”**

Take a moment to think...  
Write a technical definition of RESEARCH.  
In the chat, enter your responses.

# Definitions

*A **systematic** investigation, including research development, testing and evaluation, designed to **develop or contribute** to **generalizable knowledge***

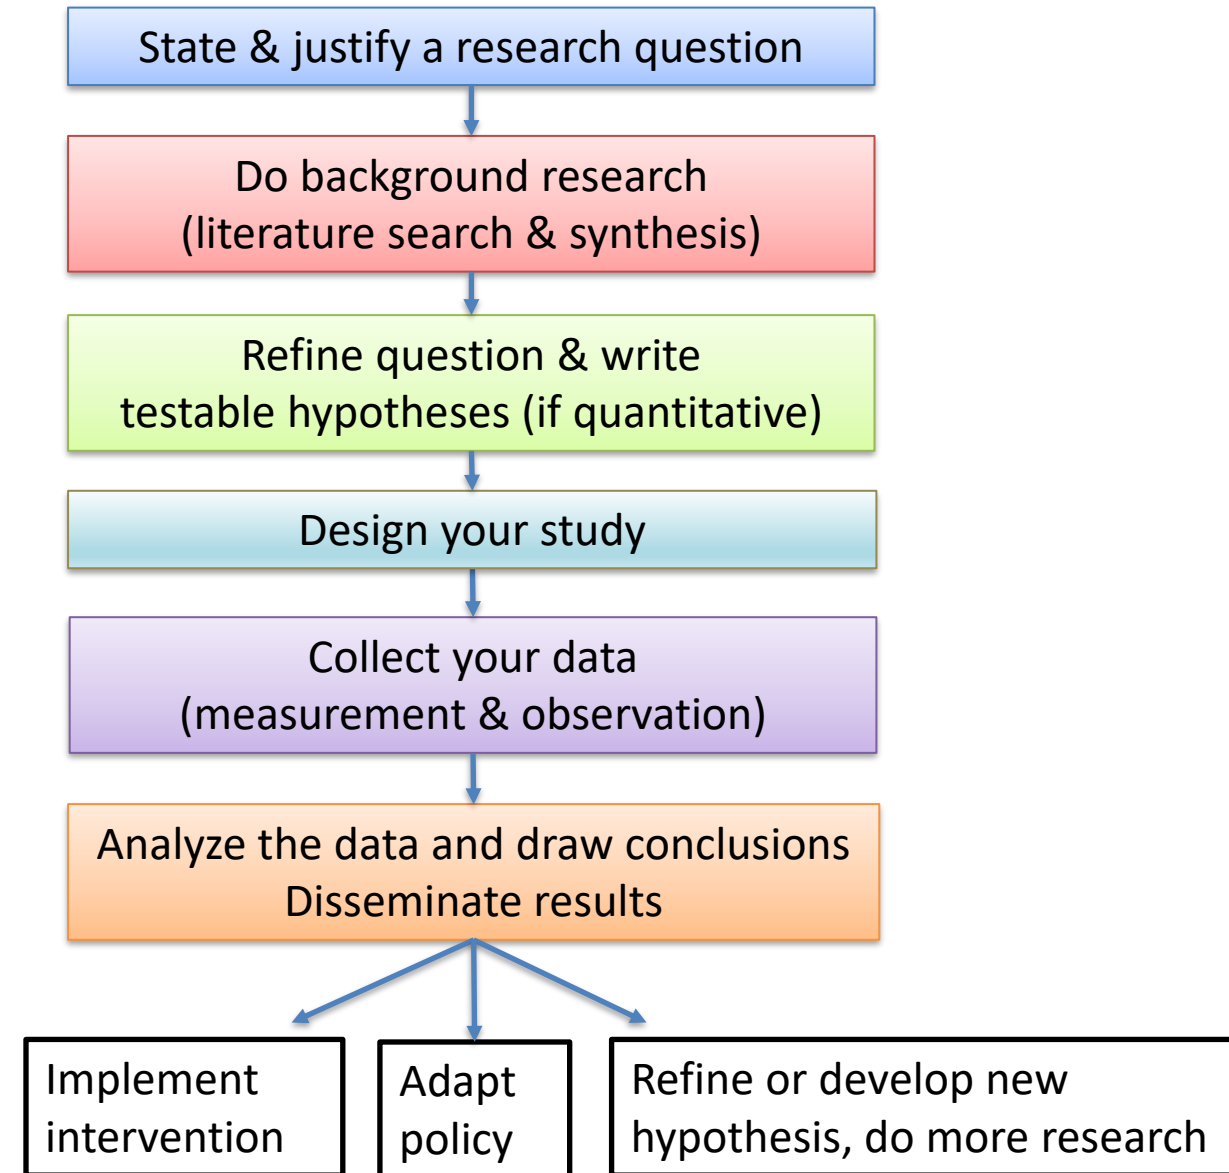

[Federal definition: 45 C.F.R. 46]

# Research is Systematic

## PH application of scientific method

# Paradigmatic Context

Content credit: Shawn Wilson, PhD  
(Opaskwayak Cree),  
*Research is Ceremony.*

# Paradigmatic Context

- Paradigm: *Underlying beliefs that guide our actions.*
  - Ways of knowing
  - How knowledge is gained
  - Ethics guiding the search for knowledge
- Think-Write-Chat: *What are the underlying beliefs of Public Health research? Consider:*
  - Ways of knowing
  - How knowledge is gained
  - Ethics guiding the search for knowledge

Content credit: Shawn Wilson, PhD  
(Opaskwayak Cree),  
*Research is Ceremony.*

# Public Health Research Paradigm

## Ways of knowing: (Epistemology)

Phenomena are directly observed externally, experimentally, independent of the researcher's identity (positivist)

Knowledge is rooted in a person's subjective experience and must be co-constructed, with the researcher's identity as relevant (constructivist)

## How knowledge is gained: (Methodology)

Observational or experimental studies (scientific method)

Quantitative, qualitative, or mixed-methods

Quantitative is often seen as more important; other approaches are gaining favor

## Guiding ethics: (Axiology)

Research ethics regulations exist, but these are the floor, not the ceiling.

Communities' ethics are not built into the regulations, but are just as important to follow.

Take-home point: There are many valid approaches to research, we will dive deep into a small subset.

# **THE WHY: GOALS OF PH-GH RESEARCH**

**Take a moment to think...**

**Share a few goals of PH or GH RESEARCH.**

---

# Goals of PH-GH Research

→ To reduce disease burden, improve population health, create greater equity and justice

- To help create or bring attention to **equity and justice**
- To determine the **burden** of a disease (how much disease is in a population?)
- To identify the **etiology or cause** of a disease
- To identify **risk factors** for a disease
- To describe the pathogenesis or natural history of a disease to **inform treatment, prevention, vaccination**, etc.
- To **develop, test, and implement** new interventions
- To **optimize delivery** of new interventions (quality, cost, impact outcomes, implementation science)
- To **gather stakeholder views** on health policy, programs, barriers, needs, and strengths [qualitative research]
- .....*And many many more*

“The term, ‘research’ is inextricably linked to  
European imperialism and colonialism...  
It is a history that still offends the deepest  
sense of our humanity.”

Dr. Linda Tuhiwai Smith

- Public health research: Long legacy of harms to individuals and communities of color, rooted in colonization.
  - Will cover more in Ethics session & CBPR session
- Students will have different personal experiences and histories with research.
- Co-opt existing structures to promote equity and justice?

Dr. Smith, Maori scholar,  
University of Waikato, New  
Zealand.

# So...Why should I know *how* to do this?

- To develop a critical read of scientific (and pseudo-scientific) studies & claims
- To know the language and the tools of research to prevent harm to your own community, or one that you work with, or to benefit your community
- If you work in PH or GH, you will likely do some of the things in this class
  - Write a proposal, attend a seminar, write up a report, review literature
  - Draft questions, evaluate & improve programs, interact with regulatory bodies, communicate research with the public
  - Manage ethical challenges of a program or project

We learn by doing. Focus on the most highly transferrable skills set for PH-GH

# Our commitment to you

To honor the different experiences and recognize different burden that talking about research has on our students;

To solicit feedback and be responsive to student needs;

To invite you to ask for support. We believe you.

# Group Assignments

Canvas: Click on Course Schedule, today's date.

- Home
- Course Schedule
- Syllabus
- Zoom
- Announcements
- Assignments
- Quizzes
- Panopto Recordings
- People
- Grades
- UW Resources
- UW Libraries
- UW Libraries Undergraduate Researcher Tutorial
- Discussions
- Ally Course Accessibility Report
- Collaborations
- Rubrics
- Pages
- Modules
- Files
- Outcomes
- BigBlueButton

- Please take a few minutes to complete the brief [UW Survey](#).
- We encourage you to explore the [Syllabus](#) and Canvas page before the start of class. If you encounter any errors on Canvas, please reach out to a member of the [teaching team](#). We are trying our best to get everything up and running, but issues do slip through. Thank you for your patience!
- You'll be spending most of the term working on a [Group Research Project](#). Groups are assigned based on quiz section enrollment, so please let us know as soon as possible if you think you'll need to change your quiz section. We hope to finalize groups by Friday, April 1.
- If you require an accommodation (see the Syllabus for more information), please complete the [Accommodation Request Form](#) and a member of the teaching team will follow up with you.

## How to Use This Course Schedule

- SPH 480 is organized by pages in this course schedule. Each class and quiz session has its own page. **Please review these class session pages before class to familiarize yourself with what is due each week**
- In general (there are some exceptions!), each Tuesday and Thursday class session page describes (1) individual work to be completed before class (typically, this includes a graded quiz) and (2) a credit/no credit Daily Deliverable that you will complete as a group with your [research project team](#)
  - All individual graded quizzes are due at 10:00AM PT on the day of class
  - Group Daily Deliverables are due twice per week
    - Daily Deliverables from Tuesday sessions are due **that same Tuesday** at 11:59PM
    - Daily Deliverables from Thursday sessions are due at 11:59PM PT on Fridays
- Assignments outside your individual "Before Class" work and group Daily Deliverables are listed (with due dates) in the "Other Assignments Due This Week" column
  - For a list of all assignments and due dates, see the [Assignments](#) tab and/or the Course Summary under the [Syllabus](#) tab
- Note: content will be published as it is finalized and is subject to change throughout the quarter. If you click on any Canvas content and it says "Unauthorized" we haven't published that content yet (but we will ASAP!). Thanks for your patience! If you are interested in watching any of the pre-recorded lecture videos before the session pages are finalized, please see [Panopto Recordings](#).

Week	Other Assignments Due This Week	Tuesday Lecture Materials	Thursday Lecture Materials	Quiz Section Materials
		Mar 29	Mar 31	Apr 1
1	<ul style="list-style-type: none"><li>• Please read "How to Use this Course Schedule" above for details on "Before Class" work and Daily Deliverables. These assignments will <b>not</b> appear in this column as they are standard throughout the quarter.</li><li>• Team Contract (due Fri, Apr 1)</li></ul>	<a href="#">Course Overview, Expectations, Introduction of PH Research</a>	<ul style="list-style-type: none"><li>• <a href="#">Framing Research Questions, Hypotheses, and Specific Aims</a></li></ul>	<ul style="list-style-type: none"><li>• Quiz Section Week 1</li></ul>

Find everything you need for the session. Open Group Assignments.

## SESSION: Course Overview, Expectations, Introduction of PH Research

To-Do Date: Mar 29 at 10:00am

### Before Class

- Please take 10 minutes to explore our course [Canvas page](#), paying special attention to the [Syllabus](#) (please at least skim the syllabus!), the [Course Schedule](#) (including the Weekly Housekeeping Box at the top), and the [Group Research Projects](#) page. Canvas is a critical resource in SPH 480, especially now that we are learning and teaching remotely. Everything you need to know for this class is on Canvas! Please get in the habit of checking Canvas regularly for SPH 480 announcements and updates.
- Watch the pre-recorded lecture video.

Objectives: Today you will...

- Meet your instructor team
- Define "research" - the what, why and how?
- Review SPH 480 philosophy & course logistics

In-Class Slides: Coming soon!

In-Class Padlet: [Here](#)

[In-Class Worksheet: PH Research Day 1 Worksheet.docx](#)

Groups (Teammates and Coaches): Coming soon!

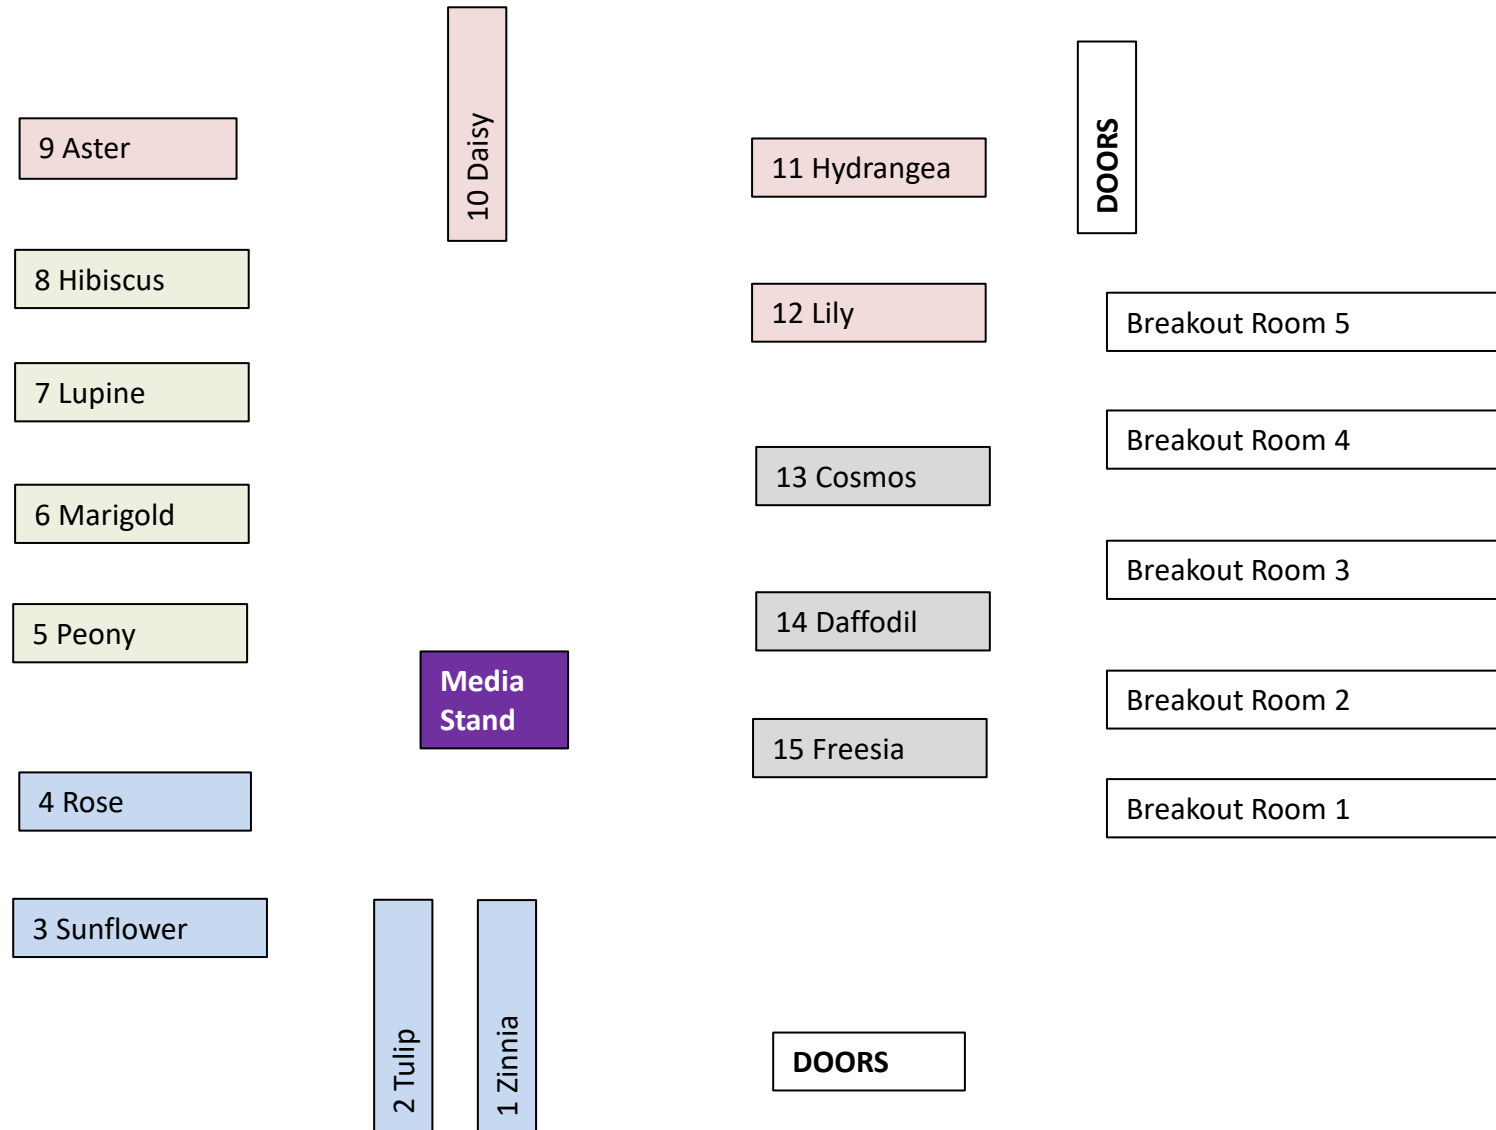

In-Class Zoom Recording: Available under Cloud Recordings in Zoom tab (typically about 1-2 hours after class ends): Coming soon!

Pre-Recorded Lecture Videos (also available under Panopto Recordings): While there is some overlap with the live session, there are additional details provided in this video.

1 min. Break! Find Your Table

# Room Map (not to scale!)

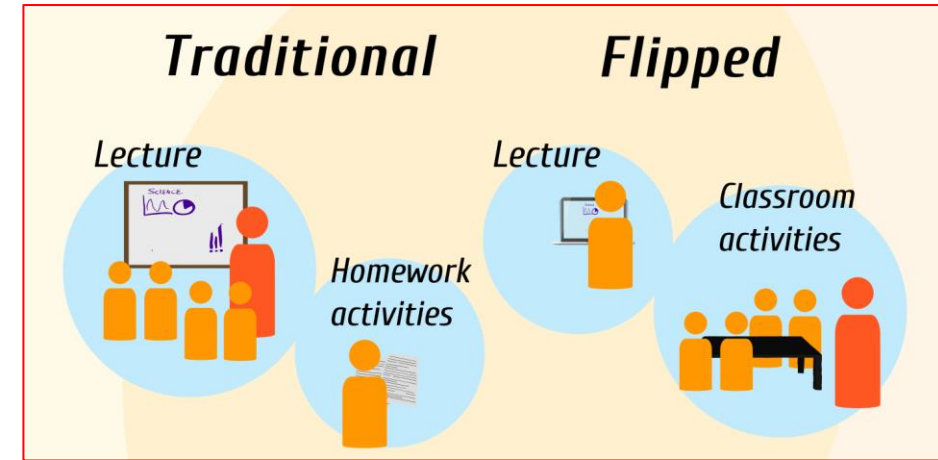

**Groups are aligned  
with quiz section.**

***If you have a quiz  
section conflict,  
please let us know  
NOW.***

# How it works

- Prepare for class: Click the link on the course schedule for the day
  - Watch videos, read articles
  - **Short quizzes each day: first is due this Thursday**
- In class:
  - Brief review of the main points, learning objectives and instructions (Profs lead)
  - Active learning: Apply prep work to your group's project
  - Participate synchronously to receive credit for the day (2 free passes)
- Quiz sections (TAs Donghoon, Kristen lead)
  - Additional tutorials, games
  - Ungraded problem sets
  - Working on group assignments

*Image Credit: Olega Bedrina's blog*

# Daily Deliverables

- Templates completed each day in class
- These build up to your **Research Protocol** and **Research Report** Assignments
- Turn in by 11:59pm on:
  - Tuesday for Tuesday's class deliverable
  - Friday for Thursday's class deliverable
- Coaches will provide feedback by the following lecture
- Expected to read and implement coach comments!

## SESSION: Research Questions

### INSTRUCTIONS

**Summary of exercise:** Today you will choose a research question, and specify specific aims and hypotheses. This document will be your road map to designing your study over the next several weeks.

**Deliverables:** By the end of this session, your group will complete the following **Specific Aims Page**:

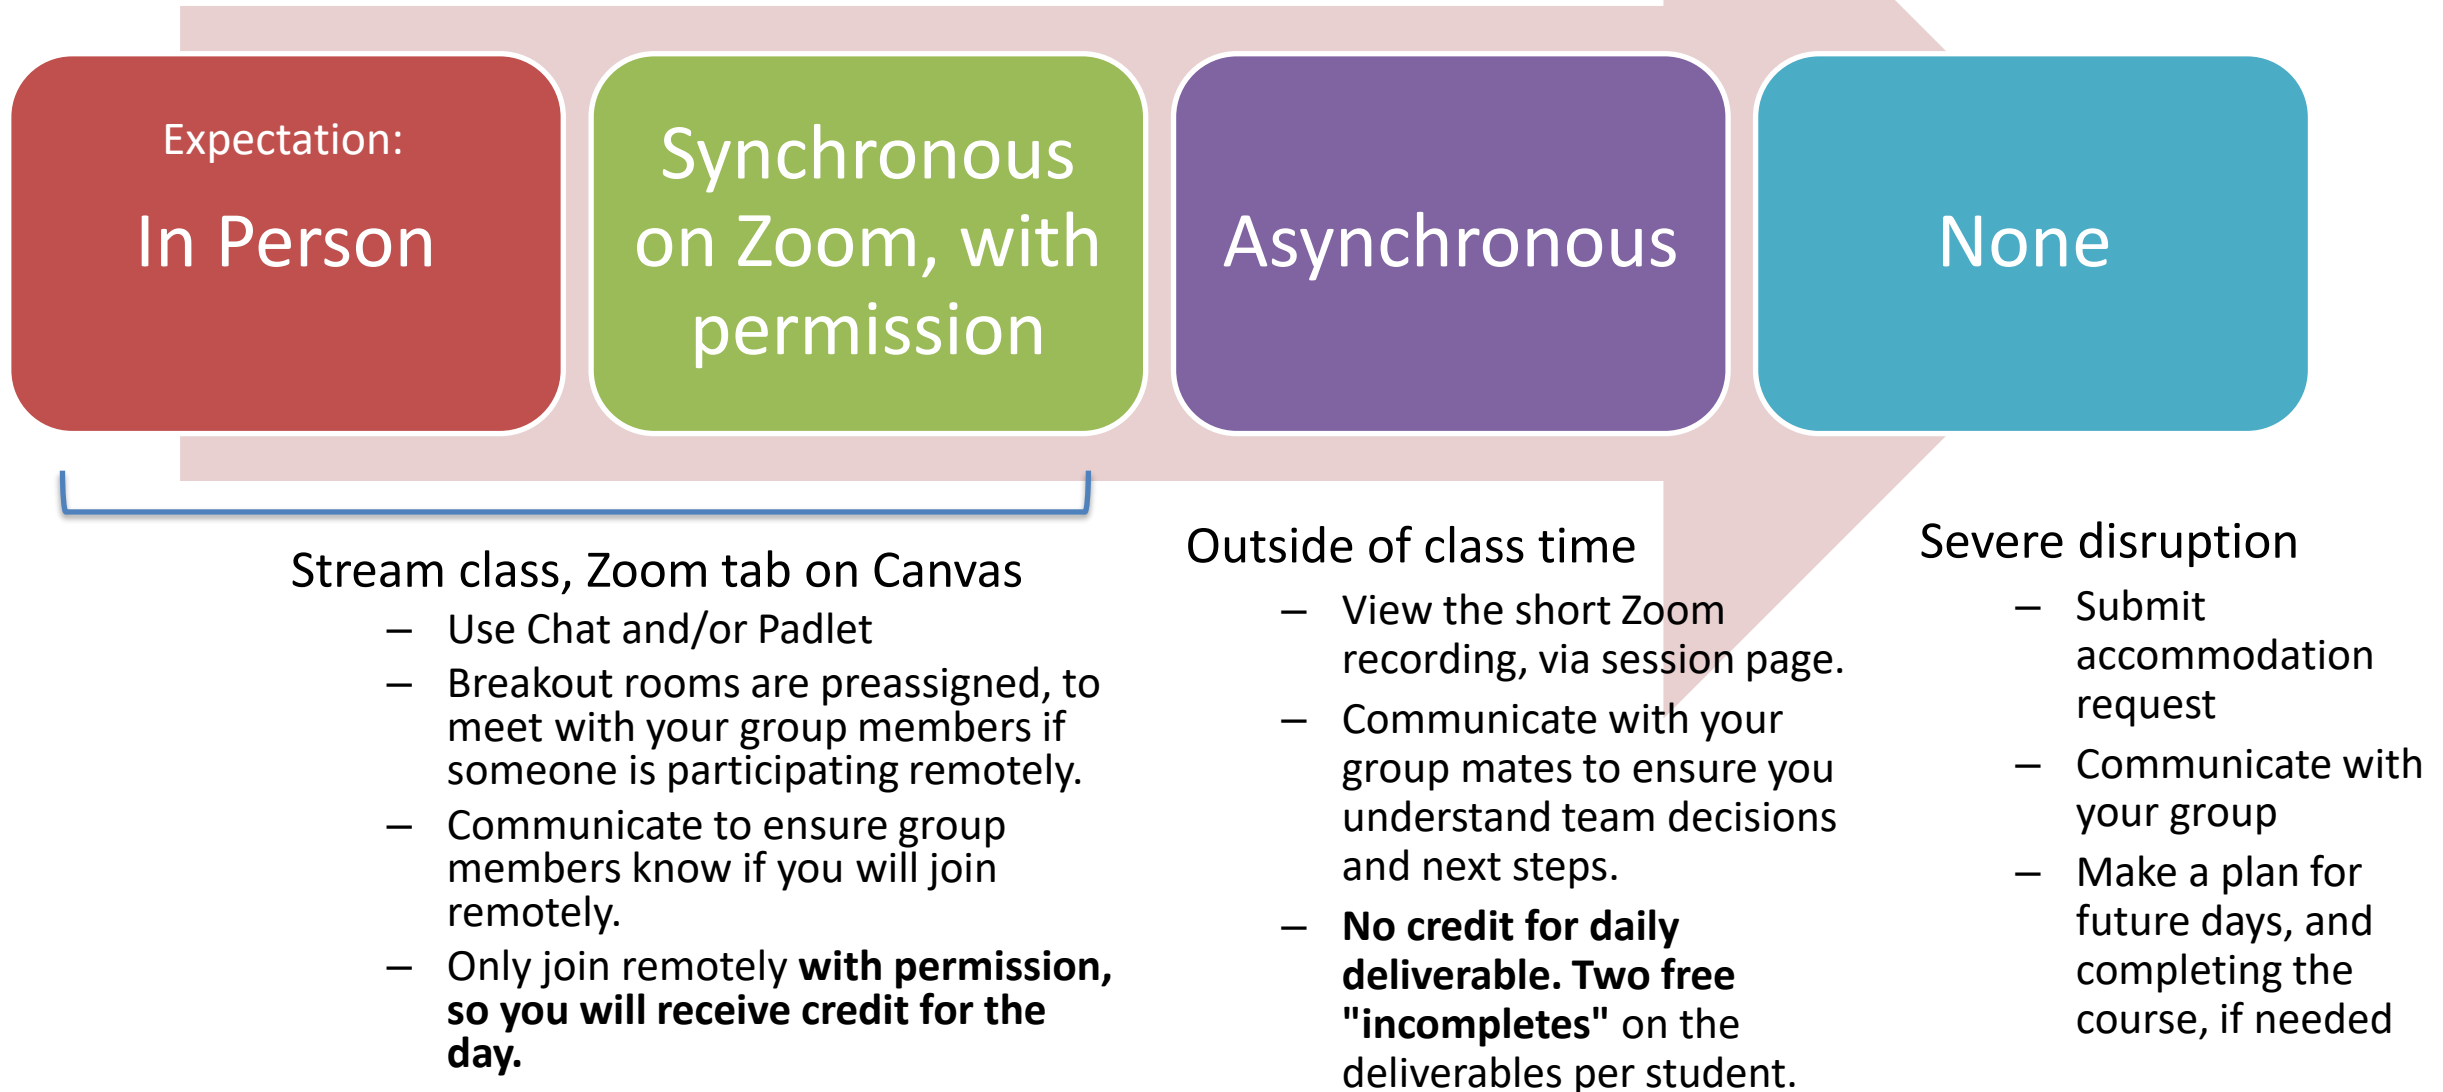

- Short statement of relevance of research question (2-3 sentences)
- Draft of literature review matrix (Populated with info from your homework reading, will need to be finalized for Research Proposal)
- 1 detailed research question
- 1 descriptive specific aim and hypothesis
- 1 analytic specific aim and hypothesis
- 1 conceptual diagram/DAG describing your analytic aim's hypothesis, including potential confounders and mediators

*\*The scribe should submit on canvas, and also email this document to all members of the group*

### Steps:

- 1) **Discuss:** In your group discuss the reading you did around your research topic. Share thoughts from the provided literature review and your own reading.
  - a. *What is the relevance of this research question?*
  - b. *What is known/unknown about this topic?*
  - c. *What might be feasible to study in the UW student population?*
- 2) **Matrix (started as homework):** Begin to populate the literature review matrix with key findings from the review paper and the article you found.
- 3) **Specify your research question:** As a group, draft a research question to fit the topic you have selected. Try to make this very specific – include the exposure, outcome, and population you will study.
- 4) **Hypothesize:** Each group member will individually write a hypothesis for this research question.
- 5) **Specific Aim:** Hand your paper to a partner, who will write a matching aim to your hypothesis.
  - a. *Talk through this together. Was the hypothesis specific enough to be able to easily write a matching aim? Work together to tighten up the aims and hypotheses, so they are consistent with one another and very clear, including all the key elements covered in the lecture/slides.*
- 6) **Draw DAGs:**

# Interacting with SPH480

## Important Safety Tips for Wearing Face Masks

UNIVERSITY of  
WASHINGTON

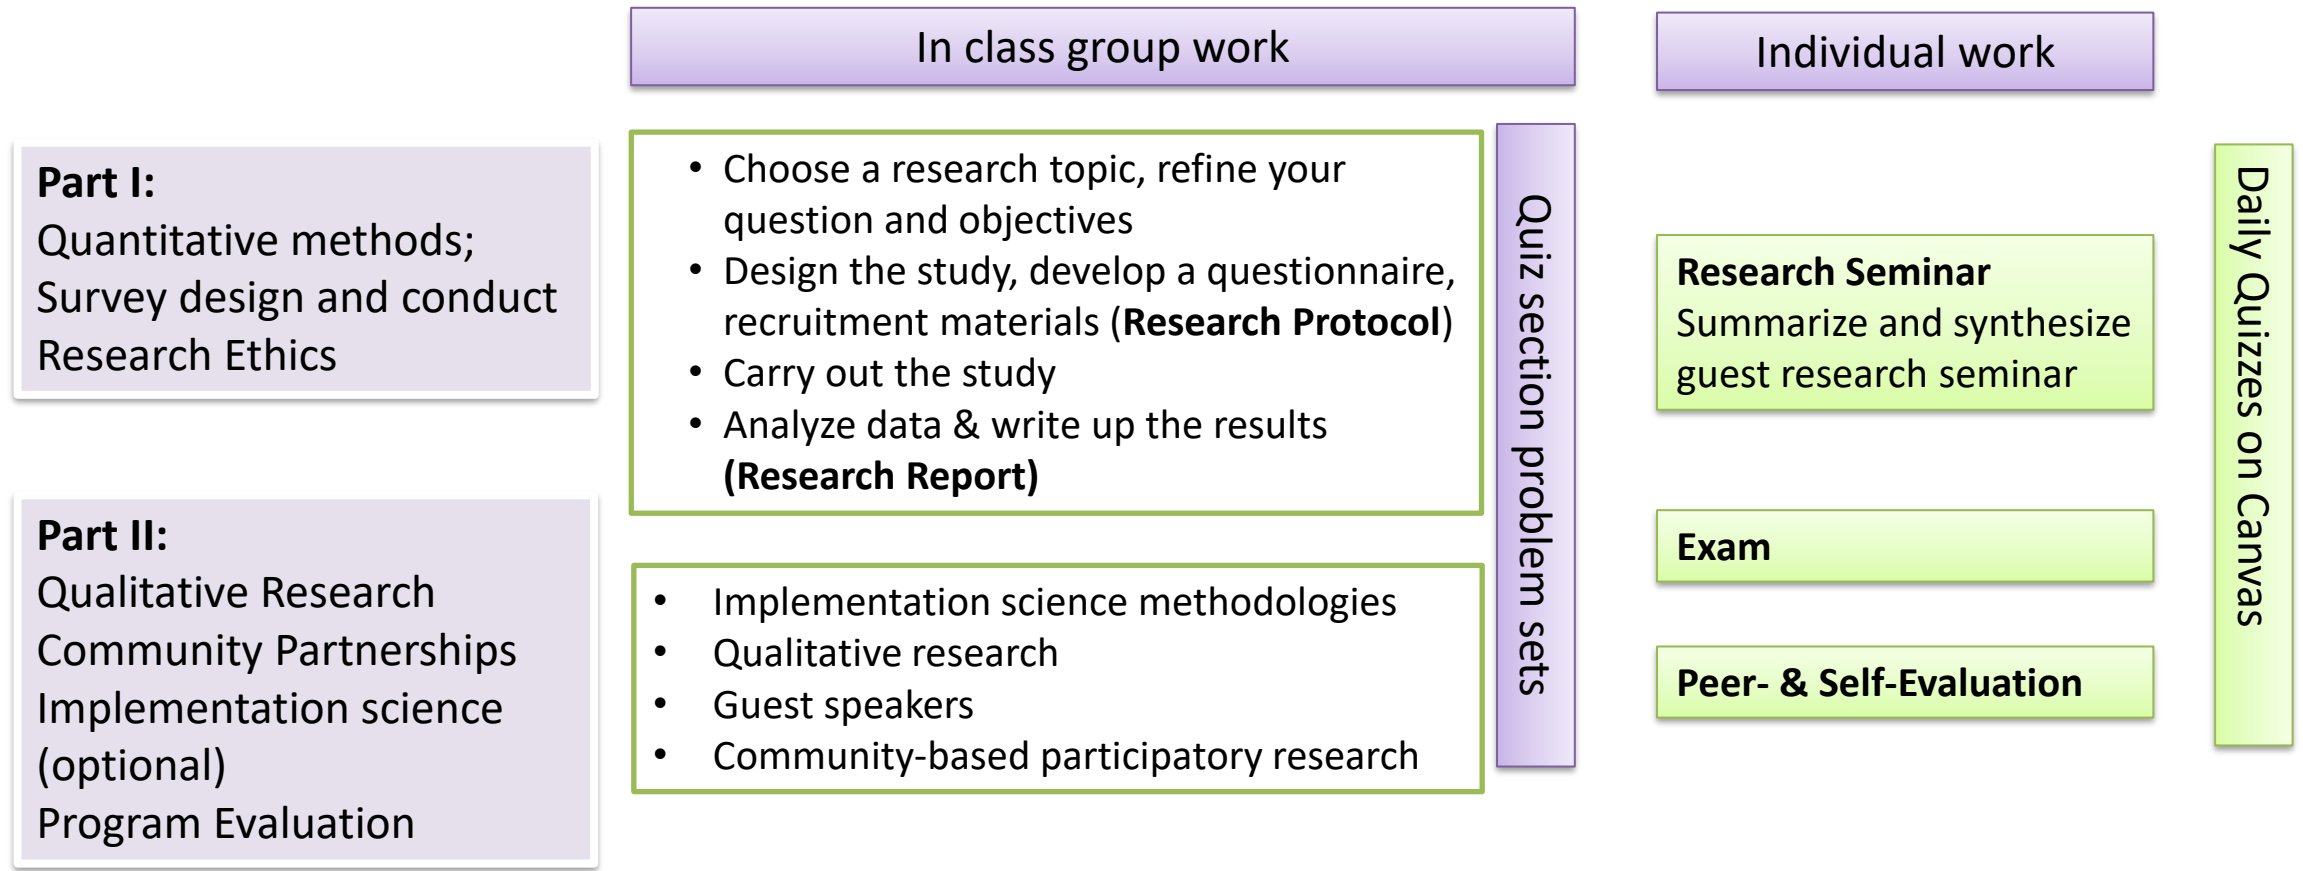

Adapted from UCSF

## On campus

- Fully vaccinated (2 weeks after last dose)
- Masks are strongly encouraged by the UW for the next 2 weeks
- You are welcome to continue masking, however long you wish!

# Teaching Team Office Hours

- Listed on Canvas.
- Drop-in at posted times, or email to schedule a private meeting
- Why? To check in, ask any questions, career advice/connections, get to know each other, feedback from your coach.
  - If you have specific questions about coach feedback or your own project, please ask your coach
  - Anything else, ask anyone on the teaching team

Casual in-person discussions, all are welcome.

Private meetings via Zoom

# Today and the Upcoming Week

Due Today	Due Thursday	Quiz Section Friday / due Friday
<ul style="list-style-type: none"><li>• Connect with your group</li><li>• Familiarize yourself with Canvas</li><li>• Watch intro/logistics video posted on the Course Schedule tab on Canvas</li></ul>	<ul style="list-style-type: none"><li>• Watch Session 2 pre-recorded lecture videos (Research Questions, Hypotheses, and Aims) on Canvas</li><li>• Complete Canvas quiz before class</li><li>• Have a research topic idea for your group project.</li></ul>	<ul style="list-style-type: none"><li>• Check in with your group</li><li>• Read/edit the <i>Group Contract</i></li><li>• Look at the <i>Research Protocol</i> and <i>Research Report</i> assignments</li><li>• Discuss ideas for your research project (big picture ideas, brainstorming)</li><li>• Wrap up any loose ends on course logistics</li><li>• <b>Submit deliverable by Friday 11:59pm</b></li></ul>
<p>If you <b>need</b> to change quiz sections, please tell us today.</p>	<p>Complete the “getting to know you” survey, if you haven’t already.</p>	<p>Get a head start on next Tuesday’s content! Take the quiz early enough to review Epi as needed.</p>

# MEET YOUR GROUP

**Introduce yourselves:** Name, pronouns, fun fact (optional)  
Share contact information as your group prefers.  
Complete questions on the handout Canvas.

# Before Next Lecture

- Connect with your group
- Discuss topic ideas (not limited to this list)
- Agree on a general topic (keep it high level)
- Goal is to help direct your research question, to be developed in the next class

EXPOSURES
<b><i>COVID-19-related behavior</i></b>
Self-reported social distancing behavior (e.g., strict observance of guidelines or not)
Self-reported adherence to masking policy
<b><i>Perceptions of COVID-19</i></b>
Perception of own risk for COVID-19 infection (e.g., high risk or not high risk)
Actual risk for COVID-19 infection (e.g., based on living situation, work environment, etc.)
Perception of personal risk for adverse outcomes due to COVID-19
<b><i>Social connections</i></b>
Perception of “belonging”
Living environment (e.g., alone vs. with others; with friends/peers vs. with family)
Social media use (e.g., high or low)
Perception of one’s social or community connectedness (e.g., high or low)
<b><i>Work/school environment/ responsibilities</i></b>
Perceived support to accommodate online learning needs during COVID-19 (e.g., adequate vs. inadequate support)
Working environment (work from home vs. in person work)
Current work/school load (e.g., hours per week, number of credits, etc.)
<b><i>Knowledge/experience with COVID-19</i></b>
Know someone who has tested positive for COVID-19
Positive COVID-19 test

OUTCOMES
<b><i>Health beliefs/practices</i></b>
Adoption of COVID-19 safety practices (e.g., compliance with masking or observance of social distancing)
Preventative care utilization
Substance use (use existing scale to measure)
Perceptions of personal COVID risk (high vs. normal/low risk)
<b><i>Physical health</i></b>
Self-perceived health status (consider existing scales)
Frequency of headaches/headache impact on <u>life</u> (use existing scale to measure)
Positive COVID-19 test
<b><i>Mental health</i></b>
Stress (Perceived Stress Scale or similar)
Depression (use existing scale to measure)
Anxiety (use existing scale to measure)
Fear of COVID-19 (high vs. low)
<b><i>Academic/work performance</i></b>
GPA
Self-perceived performance
<b><i>Vaccine outcomes</i></b>
Interest in getting vaccinated for COVID-19 (e.g., high or low)
Received COVID-19 vaccine
